Roll No. : _____   **Total Printed Pages :** 3

4E2914

B. Tech. (Sem. IV) (Main / Back) Examination, June/July - 2013
4CS1 Microprocessor & Interface

Time : **3** Hours]   [Total Marks : **80**
                                                [Min. Passing Marks : **24**

*Attempt any **five** questions selecting one question from each unit.*
All questions carry equal marks. Schematic diagrams must be
shown wherever necessary. Any data you feel missing suitably be
assumed and stated clearly.
Units of quantities used/ calculated must be stated clearly.

Use of following supporting material is permitted during examination.
(Mentioned in form No. 205)

1. _____NIL_____   2. _____NIL_____

UNIT - I

1 (a) Explain the function of various control and status signals available on 8085 microprocessor.

8

   (b) Why are AD_7 - AD_0 lines multiplexed ? with the help of latching circuit, explain how these lines are demultiplexed ?

8

OR

1 (a) Explain the function of program counter, Accumulator, stack pointer and flag register in 8085 microprocessor in brief.

8

   (b) Explain the function of various types of buses in 8085 microprocessor in brief.

8

UNIT – II

2 (a) Explain the all type of Rotate instructions with the help of suitable examples.

8

(b) Write a program to store hexadecimal data AB in memory location 2300, split the data in the form of OA and OB, and store them in memory location 2501 and 2502.

8

OR

2   (a) Compare the function of the following instruction pairs :
   (i)   RST and RET
   (ii) XTHL and XCHG
   (iii) JMP and CALL
   (iv) STAX and LDAX

8

(b) Describe various addressing modes available in 8085 microprocessor with two example of each.

8

UNIT – III

3   (a) What is the use of "Stack" ? Illustrate the PUSH and POP operations with help of suitable example.

8

(b) Draw block diagram of 8259 programmable interrupt controller and explain function of various blocks.

8

OR

3   (a) Explain the machine cycles of CALL and RET instructions with the help of timing diagram.

8

(b) What do you know about the interrupt facilities available with 8085. Explain the RIM and SIM instruction briefly.
8

UNIT - IV

4   (a) Explain various programming modes of 8279 keyboard and Display controller. Also draw a block diagram showing its interfacing with microprocessor 8085.

8

(b) Explain the all operation mode of 8255 in brief.

8

OR

4   (a) Explain the control word of 8254 PIT with example. Also explain the all operation modes of 8254 with diagram.

8

(b) Design a square wave 'generator with a pulse width of 150 μ sec. by using 8254. Set the timer in mode 3. The clock frequency is 2MHz.

8

UNIT – V

5   (a) Write brief technical note on bus standard RS 232C and IEEE 488.

8

(b) Draw the block diagram and pin description of USART 8251 and briefly explain formats of its mode, command and status words.

8

OR

5   (a) Explain the application of microprocessor in Interfacing scanned multiplexed display and liquid crystal display.

8

(b) Explain RS 422A in brief with the use of diagram.

8
